

STANDING ON THE CUTTING EDGE

in Science of Mind

Rev. Kris Alexander

INNOVATIVE

GOD QUALITY: CREATIVITY

Those people standing on the cutting edge are the progressives, the activists, the dreamers, and the idealists. We are the ones who can glimpse a world that works for everyone and take the steps necessary to achieve it. We act from Creativity and Innovation to usher in this vision.

UNCHARTED

GOD QUALITY: FAITH

The cutting edge is slicing into something brand new. We are entering a time and place that humanity has never been before, and therefore we don't have a map of what it will look like. As we cut into this new reality, we act from Faith and Truth, staying in Principle.

UNCROWDED

GOD QUALITY: STRENGTH

The cutting edge is not mainstream society. Rather, it is those who are at the forefront of technology, spirituality, thinking, and living. Standing on the cutting edge means standing with the few. We stand in strength knowing that we have all of the tools needed to forge ahead.

SHARP

GOD QUALITY: POWER

The cutting edge must be sharp, otherwise it would not be able to cut. This means that those people standing on the cutting edge must be conscious, clear, and sharp in their thinking and actions. We no longer have the luxury of carelessness or nonchalance. We stand in our Power.

CONNECTED

GOD QUALITY: LOVE

When a sharp knife is observed under a microscope, we see that the molecules are tightly connected and organized. This is necessary to slice through any obstacle. In much the same way, we stand on the cutting edge connected to one another in solidarity and Love.

UNCOMFORTABLE

GOD QUALITY: PEACE

By standing on the cutting edge, we are committed to consistently growing, changing, and transforming. The call to be on the cutting edge of humanity is the hero's journey, and yet there is a peace that can be accessed as we face this uncharted territory together.
